

## Alphabet Concentration

### **What is "Alphabet Concentration" and why is it important?**

"Alphabet Concentration" is a game that helps your child learn letters of the alphabet. Instant recognition of letters and sounds is an important component of reading.

### **How can I use "Alphabet Concentration" with my child?**

Choose 7 to 15 pairs of upper and lower case letters from the alphabet cards provided. To play the game, turn the cards face down and shuffle them. Have your child turn over two cards and identify each letter and the associated sound. If the upper case and lower case cards match and your child identifies them correctly, he can place them in a pile, keep them and take another turn. If the cards do not match or if he cannot read them, you take your turn. When all the cards are matched and identified, the person with the most cards wins.
