

## Alphabet Puzzles

### **What is "Alphabet Puzzles" and why is it important?**

"Alphabet Puzzles" is an activity that helps children match uppercase letters of the alphabet with their corresponding lower case letters. This ability is an early step in literacy learning. Your child must be able to identify letters and their sounds before he can learn to read words.

### **How can I use "Alphabet Puzzles" with my child?**

You and your child can cut out the attached puzzle pieces. Spread out the pieces and encourage your child to match an uppercase letter with its lower case counterpart. Your child can work with three or four pairs of letters until they are learned. Work with several more pairs until all 26 letter patterns have been matched.
