

Structured Language Experience Story “ide” #2

Jane cut herself accidentally. She went to look for something to clean the wound. She found a bottle of Hydrogen Peroxide and read the instruction guide on how to use it to clean her cut. She then put direct pressure on the cut and had to bide her time until the bleeding stopped. When it did, she put on a Band-Aid and went outside to go body surfing as high tide came in. When Jane got to the beach, her friend was able to provide a perfect spot for them to enjoy the surf.
